

## AKI 2021 – Fortune Cookie

Use Model Magic to create a fortune cookie sculpture and imagine the future!

Recommended for: Students in Grades K-5

You will need the following materials:

- White Model Magic
- Brown **washable** marker
- Small slips of white paper
- Pencil

How to create your Fortune Cookie:

1. First, take a piece of white Model Magic (about the size of a golf ball or ping pong ball) and roll it into a ball.
2. Take a brown **washable** marker and color all over the Model Magic.
3. Now, begin kneading (mixing) in the color with your hands so it turns from white to tan, which is the color of a fortune cookie. This may take a little while and you may have to add more marker as you go. (If you don't want the model magic to touch your hands, you can use a pair of gloves)
4. Flatten the ball out so that it looks like a mini pancake.
5. Then, carefully fold it in half (you may want to fold it over your finger) – make sure to leave a space in the middle for your message.
6. Use your fingers to pinch the two ends so that they meet in the middle.
7. Continue to form your cookie until it looks the way you want.
8. Set your cookie aside and write out your vision for the future on the small slip of paper using a pencil. You may want to ask a grownup to help you cut some paper to size so it fits inside your cookie!
9. Slide the small slip of paper into the cookie and set it aside again. In about 3 days, your Model Magic fortune cookie will be fully dry.
